

EFFECTIVE. PROFITABLE. EX-308 FOR PSORIASIS AND VITILIGO

ADVANCED UVB LASER
PHOTOTHERAPY:
FIRST IN SOUTH AFRICA

FEATURES

- Fast clearing and long remissions.
- More effective, safe and convenient than topical treatments.
- Positive outcomes after very few treatments.
- Rapid and safe clearing of stubborn psoriatic lesions.
- 84% of psoriasis patients have 75% clearing in 6 - 10 sessions.
- After 2 - 4 weeks of thrice weekly treatments, the degree of vitiligo repigmentation is higher than with any other therapy.
- Slightly more than 50% of the vitiligo patients showed 75% or more pigmentation after 30 treatments or less.
