Why the MOSAIC F1™ is SUPERIOR

- Automatic Total Density Count
- Chaos Scanning Technology
- Dual Operation Modes
 - **Dynamic mode:** Continuously delivers randomised beams at a high speed and sufficiently covers large facial areas, making it the fastest skin regeneration systems available.
 - **Static Mode:** This stamp-like approach is suitable for smaller lesions. It instantly delivers 50 to 500 spots/cm² for virtually pain-free treatment.
- MOSAIC has 4 treatment tips instead of 3.
- Complete Physician Control.
- Dramatic difference after just one session.
- Wider range of flexibility and treatment options.
- High Patient Satisfaction.

Regeneration Procedure in Skin Tissue

Redefining the World of Aesthetics

Safe and Effective for ALL Skin Types

Now affordable in South Africa
