transporting case

## New portable CO<sub>2</sub> laser system 15watt for surgical and fractional treatment

## OPTIONALS

**BUTTERFLY-TOUCH III**  
fractional scanner

**BUTTERFLY-TOUCH I**  
elliptical scanner

**universal micromanipulator for GYN and ENT**

**EASLASE-CO<sub>2</sub>**  
SPT15

### LASER SPECIFICATIONS

|                       |                                   |
|-----------------------|-----------------------------------|
| TYPE                  | sealed off CO <sub>2</sub>        |
| WAVELENGTH            | 10.600 nm                         |
| MODE                  | TEM <sub>00</sub>                 |
| TISSUE EXPOSURE MODES | Continuous - Pulsed - Superpulsed |
| POWER ON TISSUE       | 0.5 - 15 watt                     |
| SUPERPULSE PEAK POWER | 500 watt                          |
| MINIMUM PULSE         | 100 µs                            |
| DISPLAY               | touch screen                      |
| POWER SUPPLY          | AC 220V, 50 Hz                    |
| DIMENSIONS            | 360 x 610 x 210 (h) mm            |
| WEIGHT                | 10 Kg                             |

### FRACTIONAL SCANNER SPECIFICATIONS

|                    |                       |
|--------------------|-----------------------|
| SELECTABLE FIGURES |                       |
| SIZE               | 3 - 18 mm             |
| SPOT               | mm 200 µm, adjustable |
| PAUSE TIME         | 0.2 - 2.0 ms          |

**TEAM LASER® s.r.l.**  
laser technology concept

the new portable surgical laser

*Foundation Anniversary*

TEAM LASER s.r.l. has been a reliable presence in the advanced medical laser system technology, investing in the research and development of medical laser applications in Dermatology, Plastic Surgery, ENT, Gynaecology, General Surgery, Dentistry, Veterinary Surgery and other specialities

TEAM LASER ...

a good choice for the years to come!
